Spare parts availability KRC2 ed05 controllers and parts

Dear Sirs,

our robots of the controller generation KRC2 ed05 have been in operation for more than seven years in the meantime.

The controller generation KRC2 ed05 will be discontinued as of June 30, 2012 and replaced by the subsequent series of the generation KRC4.

KUKA Roboter is renowned for its long term availability of spare parts. Especially the automotive industry appreciates the long sustainability of our robot systems.

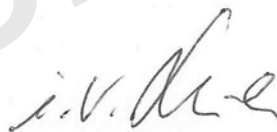

KUKA Roboter GmbH will ensure the supply of spare parts for KR C2 controllers until 10 years after the product discontinuation. Thus we ensure the supply of spare parts until end of 2022.

However, even after 2022, we will do our utmost to deliver new parts and ensure repair of used parts, as long as possible.

Best regards,

KUKA Roboter GmbH

Spare parts availability KRC2 controllers and parts

Dear Sirs,

our robots of the controller generation KRC2 have been in operation for more than eleven years in the meantime.

After the discontinuation in 2005, we delivered the subsequent series of the generation KRC2 ed05.

KUKA Roboter is renowned for its long term availability of spare parts. Especially the automotive industry appreciates the long sustainability of our robot systems.

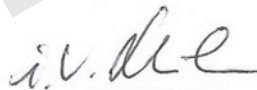

KUKA Roboter GmbH will ensure the supply of spare parts for KR C2 controllers until 10 years after the product discontinuation. Thus we ensure the supply of spare parts until end of 2015.

However, even after 2015, we will do our utmost to deliver new parts and ensure repair of used parts, as long as possible.

Best regards,
